PROFESSIONAL EXPERIENCE

MILL5 Inc.

Boston, MA

Associate Software Engineer

Jan 2020 – Mar 2020

- Optimized application by updating current framework to Material UI and applying global theming to pages, adding React functionality into different features such as drop-downs and form fields while styling components, and working with Docker to integrate an identity server
- Integrated React with Typescript to build out a client data management platform while implementing REST APIs to fetch real-time client data, Bootstrap, and utilizing Bitbucket, Confluence, and Jira
- Communicated directly with client to identify issues and provide solutions to build features in the application

Hello Raye Incorporated

Boston, MA

Junior Software Developer

June 2019 – Oct 2019

- Developed early stage front-end UI website for designers and suppliers to coordinate and construct 3D office spaces; contributed through 90% of development of the application before release to users
- Effectively programmed dynamic components in React, styled with CSS, Bootstrap, and Redux
- Transitioned into backend development with creating and modifying API calls through Controllers and Services utilizing C# and .NET Core
- Collaborated with the CTO, a developer, and designer working cross-functionally to build website's UI including landing pages, layout, styling, modals, animations, forms, and navigation

Launch Academy

Boston, MA

Apprentice Full Stack Developer

Oct 2018 – Feb 2019

- Followed agile and scrum methodology by attending daily standups, fortified problem-solving skills, learned from cohort mates, adapted to a rapid-paced environment, and multi-tasked on assignments and projects
- Developed technical collaboration skills through pair programming, applied object-oriented programming principles, databases, test-driven development, and attained an open mindset for creative programming
- Integrated component lifecycle methods such as fetching backend data and mounting components

DEVELOPMENT PROJECTS

Kevin Gillooly Dev Portfolio (dev-personal-portfolio-3.herokuapp.com)

Boston, MA

- Designed a component-driven application which includes PodcastR (Launch Academy project), LinkedIn profile and GitHub profile to help the user learn more about my background and professional career
- Road-mapped project which included React, Bootstrap, npm, GitHub source control, HTML/custom CSS, Heroku CI pipeline, and client side to develop a public portfolio

EDUCATION

Providence College

B.S. Finance

Providence, RI

Sept 2014 – May 2018
